

# Master of Dietetics

POSTGRADUATE

**DEAKIN**  
UNIVERSITY

# Explore the relationship between diet and disease

---

The Master of Dietetics prepares you to solve widespread health issues through science-based, diet-related treatments. Take a big step towards becoming an Accredited Practising Dietitian, and build advanced skills that allow you to improve the health and wellbeing of the individuals and communities you work with.

Professionally accredited  
by **Dietitians Australia**

'Hearing about students' fantastic placement experiences is one of my favourite parts of my job. We have strong and long-standing relationships with our placement partners, students undertaking placement projects which make a meaningful contribution to communities, and the opportunity for students to plan an elective placement.'

**Alison Spence**  
Course Director and co-ordinator of  
Community and Public Health Nutrition  
placements, Master of Dietetics

## Build industry connections

---

Open the door to professional development, research, and networking opportunities with our partner network. Some of our partners include Nutrition Australia, Austin Health, Barwon Health, Peter MacCallum Cancer Centre and Western Health and many community health centres.

## Fast track your career goals

---

Deakin's Master of Dietetics is one of the few in Australia that you can complete in just 18 months of full-time study. This means you can move into your dream role and start helping people sooner.

## Gain industry experience

---

You'll complete a minimum of 22 weeks placement throughout the course. Gain diverse experience by completing your placements across a mix of locations including clinical, community and food service settings.

## Master of Dietetics

### OVERVIEW

Deakin's Master of Dietetics explores the important relationship between diet and disease. Accredited by Dietitians Australia and shaped by decades of industry input, this course trains you to prescribe science-based treatments for a wide range of health issues, from obesity and diabetes, to allergies and malnutrition. If you're passionate about improving the wellbeing of the people around you through diet, the Master of Dietetics allows you to cut through misinformation to unlock solutions that are shaped by evidence and tested with scientific rigour.

Combine studies in medical nutrition therapy, public health nutrition and food service management to graduate with a well-rounded set of skills that prepare you for a variety of roles. Your problem-solving abilities, communication skills and dietetic knowledge will allow you to thrive in community and public health settings. Prefer to work one-on-one with clients? You will feel just as comfortable using your interpersonal skills to develop tailored treatments in a clinical setting that deliver life-changing results.
