

Alcoa Project collection – finding aid

Descriptive summary:

Title

Alcoa Project collection

Date range of collection

1961 – 1984

Scope and content note

The Alcoa project was established at the Warrnambool Institute of Advanced Education in 1979, with James Guthrie (Lecturer, Faculty of Business Studies, WIAE) as project lead. The project was a result of the proposed construction of an aluminium smelter at Portland by Alcoa.

The Alcoa project was designed to collect information about the political, social, economic, and environmental impact of the development and to this end, material such as news clippings, books, journals, articles, reports, photographs, audio files and ephemera were collected. The material was specific to Portland but also contained comparative items from interstate and overseas.

An important aspect of the project was that the material should be comprehensively described and indexed and made available via a database.

The Alcoa project collection appears to have been maintained and indexed up until c.1984, when staff changes may have seen it come to an end. The collection became part of Deakin University Library's Special Collections after 1990, when WIAE merged with Deakin University.
